

# Irrigation

---

Irrigation customers are subject to the following rates and appropriate taxes:

- Water Flat/Minimum
- Water Consumption
- Groundwater Resource Fee

The water flat fee is based on the meter size. For example, a customer with a 1" water meter has a different monthly flat fee than a customer with a 2" meter. This will be the same amount each month.

The water consumption rate and groundwater resource fee are all billed per 1,000 gallons each month. Water consumption and groundwater resource fee are flat rates regardless of water use, meaning each 1,000 gallons is billed at the same rate.
