

MICHAEL ROSSO RA

Project Manager for Architekton

I am extremely excited and humbled to be a part of this great team. I am an innovative, hands-on architect with a passion for community-centric architecture. My experience as a creative collaborator has demonstrated special skills as a Project Manager in consensus building with clients, design team members and construction managers. Over the last 23 years, I have been the project manager, project architect, and/or designer on over 20 community, recreational and aquatic facilities for different municipalities, and institutions across the state of Arizona.

My management experience included recent community projects such as Casa Grande Community Recreation Center / Boys & Girls Club, Maricopa Copper Sky Multigenerational and Aquatic Center, and the Arizona Complete Health Avondale Resource Center. Additionally, I have had the pleasure of work with the Town of Marana on the Marana Police Department and the Northwest Fire District Administration Building.
